

## Web Services

i-Content

### *Website Design, Development & Hosting*

I-Evolve understands that your website has to be an effective marketing tool for your company. Our web team knows websites - what works, what doesn't, and how to get the best results.

We recognize that your website is the face your company presents to the world. Our web team includes project managers, graphic designers, web developers, programmers and system engineers. We take the time to learn about your company and work with you to develop a website that will meet and potentially exceed your goals.

#### **Responsive Design for Mobile**

Our Responsive Design websites include custom built templates tailored to deliver content in such a way that visitors will see the same content regardless of the device they are using to access the website - that content will just be presented differently.

The design process for responsive websites can take longer than for a non-responsive website. It is necessary to plan out the design before we start building your website. Planning involves determining how elements of the website will show on all screen sizes to create the best viewing experience. Additionally, we take a closer look at the functionality and add-ons you are considering and may change our recommendations based on what works better in a mobile environment. We will work with you throughout the whole process to ensure your satisfaction.

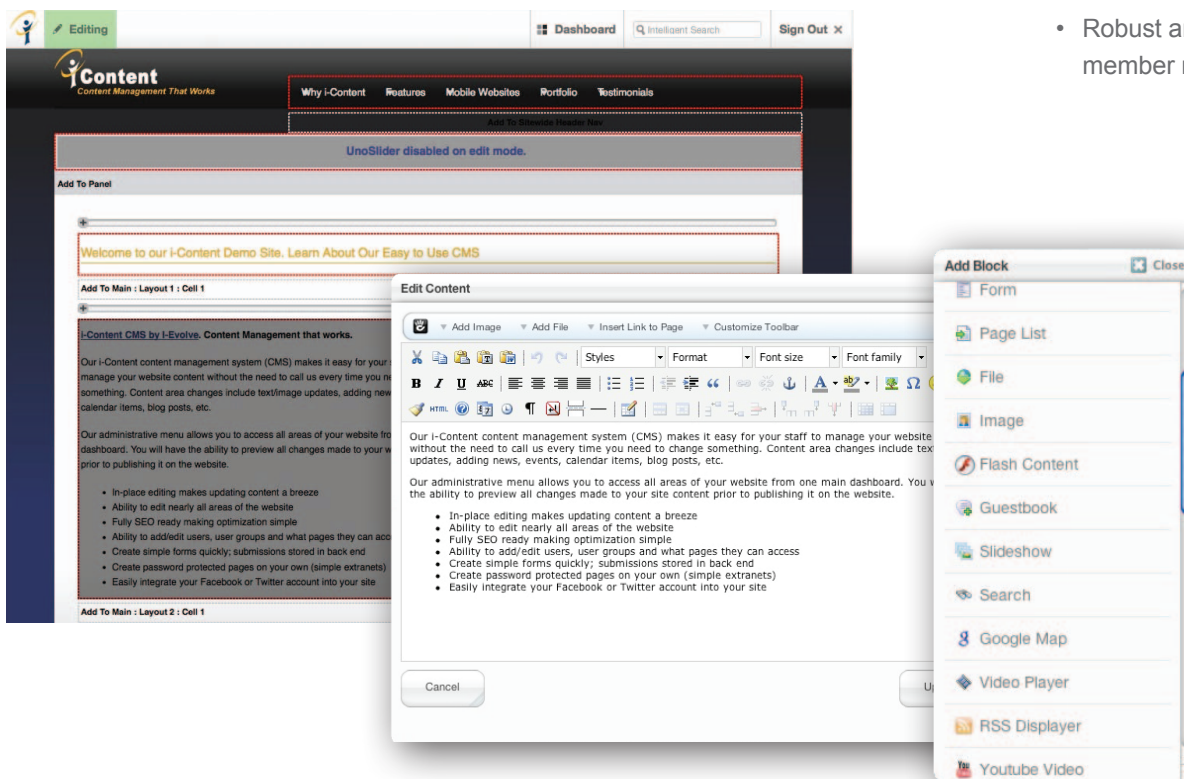

## ***i-Content: Web Services***

Our **i-Content** CMS is a powerful tool that makes managing your website content extremely easy. Our commerce package can help you expand your sales to a global marketplace. Our solutions can also be customized if they do not meet your needs out of the box.

### ***i-Content Features***

- Easy in-page editing.
